PROFILE

DevOps and cloud engineer with **10+ years in IT**, the last six in cloud infrastructure and delivery automation. Builds and operates CI/CD pipelines with **Jenkins, Terraform and Ansible**, containerised workloads with Docker, and AWS platforms supporting mission-critical enterprise systems at Accenture. Strong **Linux**, Git and Python scripting foundation, with a decade of hands-on **troubleshooting, incident management and root cause analysis** on production systems. Works daily in a multi-national environment facing both internal delivery teams and external enterprise customers, and is known for clear technical documentation. Recognised with the **SAP Hero Award (Innovator)** and **ACE**, and selected into **Accenture's Top 25 Global AI Programs**. Continuous self-learner — runs a self-funded AWS estate to build and ship pipelines, containers and automation outside work.

TECHNICAL SKILLS

CI/CD & Automation	Jenkins pipelines, GitHub Actions (OIDC keyless authentication), Terraform (modular infrastructure as code), Ansible configuration management, build and release automation, environment provisioning
Containers	Docker, Docker Compose (multi-service application stacks), Kubernetes (working knowledge, actively building)
Cloud	AWS — EC2, S3, IAM, VPC, CloudFront, Route 53; landing-zone design, platform governance, cost optimisation; SAP S/4HANA landscapes on AWS
Platforms & Tooling	Linux/Unix administration, Nginx, Git (GitHub, GitLab), Python scripting, FastAPI, shell scripting
Process & Governance	SDLC and release process definition, ITSM, change/incident/problem management, root cause analysis, SLA and KPI governance, technical documentation and runbooks
Ways of Working	Agile delivery, multi-national and multi-vendor teams, internal and external customer facing, cross-functional leadership (25+ engineers), fluent written and spoken English

AWARDS & RECOGNITION

- **SAP Hero Award — Innovator Category (SAP)** — for an innovation that measurably improved delivery quality and operational signalling across customer landscapes.
- **ACE — Accenture Celebrates Excellence; Top 25 Global AI Programs, Accenture; Performer of the Month, multiple awards.**
- **Nine × Best Performer of the Month (SAP) and Delivery Excellence Award 2019 (TCS).**

EXPERIENCE

Cloud Infrastructure Specialist — Platform & DevOps Automation Jan 2021 – Present

Accenture · Bengaluru, India

- **Infrastructure automation.** Own AWS platform architecture and standards for mission-critical SAP S/4HANA landscapes, building and scaling environments with **Terraform** to standardise provisioning and eliminate configuration drift.
- **Delivery tooling.** Designed and delivered an automated reporting and SLA/KPI signalling platform end to end, replacing manual operational reporting — **selected into Accenture's Top 25 Global AI Programs**; basis of the SAP Hero Award (Innovator).
- **Troubleshooting & RCA.** Own root cause analysis and problem management for production incidents, with instrumentation and reporting that gives stakeholders continuous visibility into platform health; sustained **100% SLA compliance**.
- **Transition delivery.** Led the end-to-end DevOps and operations transition from NTT Data to Accenture with **zero downtime**, coordinating incoming and outgoing vendors and client stakeholders.
- **Collaboration & documentation.** Lead a cross-functional engineering team in a multi-national delivery model, partnering with security, application and architecture functions; produce the technical documentation and runbooks the wider team works from.

Subject Matter Expert — Cloud Operations Nov 2019 – Jan 2021

Tata Consultancy Services · Bengaluru, India

- Owned incident response and root cause analysis for cloud-hosted enterprise workloads, cutting **resolution time 40%** through triage automation and standardised escalation paths.
- Rebuilt the engineering knowledge base across ITSM, **GitHub** and Confluence, reducing repeat-issue resolution time **30%**; process and tooling improvements lifted operational efficiency **25%**.
- Ran enablement sessions for engineers to raise process adherence and consistency across the team.

Major Incident Manager Aug 2015 – Sep 2018

IBM · Bengaluru, India

- Incident commander for severity-1 events on enterprise infrastructure — cross-team troubleshooting, stakeholder communication and post-incident review. Introduced agile practice into the incident and problem lifecycle, materially reducing mean time to resolution.

INDEPENDENT ENGINEERING

- **atla.in — Self-Funded AWS Estate & Delivery Pipelines** · Jenkins, Terraform, Ansible, GitHub Actions, Docker
Own and operate a personal production AWS estate built from scratch. Built **Jenkins pipelines running Terraform and Ansible** for provisioning and configuration, plus GitHub Actions pipelines using keyless OIDC authentication for application deployment — the full build, provision and release path, designed and maintained solo.
- **Containerised Application Stacks** · Docker, Docker Compose, Nginx
Containerised and orchestrated a multi-service enterprise application stack (web, application and search tiers) on Docker Compose as a modernisation exercise; currently extending the same workloads onto Kubernetes.
- **Applied AI & Automation Projects** · Python, AWS
Build and self-host production applications on AWS, including a retrieval-augmented generation platform and a cloud operations assistant. Publish free AWS certification study material used by the wider community.

CERTIFICATIONS & EDUCATION

- HashiCorp Certified: Terraform Associate · AWS Certified AI Practitioner (AIF-C01) · AWS Certified Cloud Practitioner (CLF-C02)
- B.Tech, Computer Science & Engineering, CMR Institute of Technology, Bangalore — 2015
