

Sai Pranav Atla

Operations & Program Manager | Launch Frameworks · Process Design · Cross-Functional Alignment

Bengaluru, India | +91 96322 98045 | pranavatla@gmail.com | linkedin.com/in/saipranavatla | atla.in

PROFILE

Program and operations manager with **10+ years in technology consulting and IT services**, the last five running strategic initiatives end to end for a global enterprise account — from concept and scoping through rollout and steady-state operation. Built the **intake and onboarding framework through which every new product and process change enters scope**, including the effort and pricing models that let stakeholders prioritise by business value and available resource. Led a **multi-region rollout moving an entire enterprise estate between providers with zero business downtime**, coordinating outgoing and incoming vendors, delivery teams and executives across India and Europe. Designs operational structures that scale: standardising triage and escalation cut resolution time **40%**, knowledge-system redesign cut repeat issues **30%**, and process and tooling changes lifted efficiency **25%** while optimising resourcing **20%**. Comfortable with ambiguity, works to aggressive timelines, and is the person executives rely on to present the plan, the risks and the trade-offs clearly. Recognised with the **SAP Hero Award (Innovator)** and selected into **Accenture's Top 25 Global AI Programs**.

CORE COMPETENCIES

Program Management	Strategic initiatives from concept to implementation, scheduling and milestone ownership, prioritisation and sequencing, dependency and risk management with mitigation planning, delivery against committed timelines
Process & Systems Design	Creating operational processes from scratch, intake and onboarding frameworks, governance models, standardisation and documentation, quality controls, designing structures built to scale across teams and regions
Roadmap & Prioritisation	Scope intake and roadmap review cadence, effort and cost modelling to support prioritisation, business-value and resource trade-off analysis, annual planning and contract cycles, proposal and business-case preparation
Stakeholder Engagement	Primary point of contact for a global enterprise partner, executive and C-level communication, cross-functional alignment across delivery, security, product and business teams, multi-vendor coordination, building consensus across dispersed groups
Multi-Region Rollout	Provider-to-provider migration and transition programmes, launch and cutover planning, regional and time-zone considerations across India and Europe, readiness assessment, post-launch stabilisation
Change & Scale	Process improvement and change management, operating-model design, capacity and resource planning, training and enablement to embed new ways of working, automation of manual operational workload
Tools & Analysis	Workflow and ticketing systems, knowledge and documentation platforms, operational reporting and dashboards, effort calculators and planning models, data-driven capacity analysis

EXPERIENCE

Program & Operations Lead — Enterprise Account Jan 2021 – Present
Accenture · Bengaluru, India · client: SAP

- **Built the intake framework.** Designed and own the structure through which **every new product and process change enters scope** — as single point of contact between SAP and Accenture, with direct engagement across SAP India leadership and SAP's European organisation.
- **Prioritisation & business case.** Build the effort calculators and cost models that let stakeholders weigh initiatives against business value and available resource; prepare proposals and quotations through annual planning cycles.
- **Multi-region rollout.** Led the end-to-end transition of an enterprise estate from one provider to another with **zero business downtime**, coordinating outgoing vendor, delivery teams and client executives across regions; formally recognised for execution quality.
- **Operational structures that scale.** Define the operating model, processes, standards and quality controls the account runs on; own governance cadence and the executive reporting that keeps stakeholders aligned on status, risk and trade-offs.
- **Removing manual load.** Identified a recurring reporting bottleneck and delivered an **automated reporting and performance-signalling platform** that replaced manual reporting across the account — selected into Accenture's Top 25 Global AI Programs; basis of the SAP Hero Award (Innovator).
- **Team & capacity.** Lead a **16-member operations team** across time zones — hiring, onboarding, capacity planning and enablement — sustaining **100% SLA compliance**.

Subject Matter Expert — Operations Nov 2019 – Jan 2021
Tata Consultancy Services · Bengaluru, India · client: SAP

- Redesigned triage and escalation processes across the account, cutting **resolution time 40%**; rebuilt the knowledge and documentation system, reducing repeat issues **30%**.
- Implemented process and tooling improvements that lifted operational efficiency **25%** and optimised resourcing **20%** through data-driven capacity planning; ran enablement programmes to embed the new processes across the team.
- Sustained **NPS above industry average** through structured stakeholder communication. Nine 'Best Performer of the Month' awards and the 2019 Delivery Excellence Award.

Major Incident Manager Aug 2015 – Sep 2018
IBM · Bengaluru, India

- Coordinated cross-team response to critical incidents on enterprise platforms under time pressure, owning real-time executive and customer communication and post-incident review. Introduced agile practice into the incident and problem lifecycle, materially reducing resolution times and improving throughput.

INDEPENDENT PROJECTS

- **Real-time market data platform.** Built and operates a live market-data service on cloud infrastructure, integrating a broker API for streaming data — self-directed work in the financial-data space, built end to end and paid for personally.
- **Applied AI and automation.** Builds and ships production AI tools end to end, including an assistant that answers operational questions from an indexed documentation corpus; publishes free cloud certification study material used by the wider community. Learns by building and running things rather than by theory.

AWARDS, CERTIFICATIONS & EDUCATION

- **SAP Hero Award — Innovator Category (SAP)** · **ACE — Accenture Celebrates Excellence** · **Top 25 Global AI Programs, Accenture** · **Performer of the Month, multiple** · **Nine x Best Performer of the Month (SAP)** · **Delivery Excellence Award 2019 (TCS)**.
- **AWS Certified AI Practitioner** · **HashiCorp Certified: Terraform Associate** · **AWS Certified Cloud Practitioner**
- **B.Tech, Computer Science & Engineering** — CMR Institute of Technology, Bangalore, 2015
